## FIRST QUESTION RESPONSE

### DATA TRANSMISSION TO DAEP 2019

### FCC FORM 470 APPLICATION NUMBER 190018899 (FY19 C1 DAEP v2)

---

February 1, 2019

To whom it may concern:

This letter as the official response to the question submitted by Birgitta Papeman of AT&T Local Government and Education on January 30, 2019. The answer follows the question below.

I am the account manager assigned to the Hughes Springs ISD. We at AT&T are working on your RFP. We are unable to locate the address listed:

212B Keasler

Is this the correct termination point for qualification or should we use a different address?

212B Keasler is the address used by the United States Postal Service and has been used by Hughes Springs Independent School District for many years. However, due to the age of this building, the address calculated by modern map services such as Google Maps does not reflect this address correctly. In order to accurately identify this location, please use the GPS coordinates 33.000487, -94.628099. I have also provided some visuals from Google Maps on the next page if needed.

Respectfully,

Douglas Stewart
